# LEXAN<sup>™</sup> 8A23 FILM

#### DESCRIPTION

LEXAN<sup>™</sup> 8A23 Film is a one side matte, one side polished custom colored polycarbonate film. It offers high temperature resistance, excellent dimensional stability, as well as good printability without pre- treatment making it an excellent candidate for multi-layer printing for applications such as overlays, floor graphics, high-performance labels and in-mould decoration. It can be screen printed using traditional solvent based or water based inks, as well as UV or infrared drying inks and offers ease of processing for thermoforming, embossing, die-cutting, hydro-forming and bending. The matte texture offers mar resistance, and can be used over light-emitting devices (LEDs). It's low gloss level reduces glare in automobile interiors and office environments. Recent technology improvements now in effect reduce texture and color variation by 50% and allow improved gauge control (see below).

#### **TYPICAL PROPERTY VALUES\***

| PROPERTY                                   | ASTM TEST     | UNITS            | VALUE   | ISO TEST        | UNITS      | VALUE   |
